

Trans-NIH Strategic Plan for Women's Health Research

Dissemination, Implementation & Evaluation

Samia Noursi, PhD, Associate Director for Science Policy, Planning and Analysis

Moving forward - Three main components:

- Dissemination,
- Implementation, and
- Evaluation

Dissemination

- NIH Community
- Stakeholders
- Scientific Community
- Public

Implementation

- Strategies in the Strategic Plan are put into action
- ICOs partnership
- Ultimate goal
- Timeline

Evaluation

The aims of the evaluation are for it to:

- Create a chain of evidence that collectively shows progress being made along the way
- Be systematic, comprehensive, and collaborative
- Include a combination of quantitative and qualitative data
- Include short and long-term outcomes
- Provide meaningful evidence that demonstrates how achievement of the strategic plan goals and objectives contributes to mission accomplishment – for ORWH and NIH

Advisory Committees on Research on Women's Health

Working Group on the Implementation & Evaluation Plan

- Purpose and Charge
- Functional Statement:

ORWH will explore with the WG methods and metrics for evaluation, address implementation considerations in areas of inclusion across the lifespan including expanding reporting requirements for clinical trials and incorporating changes to encourage research collaboration among NIH ICOs. Some of the following issues will be discussed and prioritized: identifying major ICs initiatives, IC activities and priorities that each is involved with to facilitate and promote the above-mentioned goals.
